## SUMMARY

Full stack developer who has shipped production Next.js websites for two companies as a freelancer. Rebuilt the Ascend Aegis site from scratch as its sole developer, including a custom investor login system, and builds and maintains the Crimson Security Canada Inc. site, with a focus on structured data and AI search visibility. Moved into software from chemistry after building tools to automate work tasks.

## TECHNICAL SKILLS

**Frontend:** Next.js, React, TypeScript, JavaScript, Tailwind CSS, HTML5, CSS3, Bootstrap, Chart.js, Responsive Design

**Backend:** Node.js, Express.js, REST APIs, NextAuth.js, PostgreSQL (Neon), MySQL, MongoDB, Sequelize

**Tools & Others:** Git and GitHub, Vercel (CI/CD), Resend, Google Analytics, VS Code, Insomnia, Google Forms API

**AI and Search Visibility:** Structured data and schema markup, llms.txt, XML sitemaps, robots.txt, meta tags

## PROFESSIONAL EXPERIENCE

### Freelance Full Stack Developer, Crimson Security Canada Inc. | crimsonsecurityinc.ca

*Toronto, ON (Hybrid) | September 2026 to Present*

- Build and maintain the company website in Next.js and TypeScript on Vercel, alongside a backend developer and a search visibility specialist
- Improved AI and search discoverability by adding an llms.txt endpoint, expanding schema markup, and fixing meta descriptions
- Built the contact form, which the backend developer connected to email delivery through Resend
- Built the VAPT and Incident Response service pages and a grouped Services menu, set up Google Analytics, Meta Pixel, and Pierview tracking, and closed two reported GitHub issues

### Freelance Full Stack Developer, Ascend Aegis | aaegis-ai.com

*Toronto, ON (Hybrid) | June 2026 to Present*

- Rebuilt the company website from scratch as the sole developer in Next.js and TypeScript, deployed on Vercel with GitHub CI/CD
- Built a full investor authentication system with registration, login, password reset by email, and a private investor dashboard, using NextAuth.js, Neon Postgres, and Resend
- Built the leadership and team sections and five board director bio pages, and fixed the site wide contact form
- Managed custom domain setup and DNS configuration, and handled project handoff to the client's technical lead

### Barista Trainer / Bartender, Gruppo Terroni (Sud Forno)

*Toronto, ON | September 2021 to Present*

- Trained over 50 staff across all store locations, including shift managers, on service standards and equipment
- Built a JavaScript and Google Forms API tool that emailed managers when stock hit its reorder level
- Manage weekly ordering for the location, adjusting quantities by hand to minimize waste

### Manager, Ninetails Coffee Bar

*Toronto, ON | October 2019 to October 2020*

- Led a team of baristas and ran daily operations, quality control, and customer service
- Managed inventory and implemented safety protocols for equipment and ingredients

## PROJECTS

**Coffee Education Platform |** shokolatte.ca | github.com/Shok1to/coffee-training
Built a responsive site in Next.js and Tailwind CSS for a coffee training business, including a booking system for training sessions and digital product sales.

**Debt Payoff Calculator |** debt-calculator-bff.vercel.app | github.com/Shok1to/debt-calculator
Built a debt payoff calculator comparing Avalanche and Snowball payoff strategies, using HTML, CSS, and vanilla JavaScript, with Chart.js charts and localStorage to save a user's inputs between sessions.

## EDUCATION

**University of Toronto, Full Stack Web Development Boot Camp Certificate** | August 2023
**Meiji University, Bachelor of Science in Applied Chemistry** | March 2010
